

Looking for participants for the research study: Serious Games for Engagement and Positive Emotions during the COVID-19 pandemic.

This study is seeking participants aged 65 and above across Canada who have their own device (Android tablet or computer) and an internet connection and who want to play computer games that we have developed. We want to assess if these computer games help older adults feel they are involved in enjoyable, meaningful activities.

To participate go to this link: <https://vibrant-minds.org/vibrantminds2/start>

For more information, email Melika Torabgar (torabgar@ualberta.ca).

Principal investigators: Dr. Adriana Ríos Rincon (aros@ualberta.ca) – Occupational Therapy, University of Alberta,

Dr. Eleni Stroulia (stroulia@ualberta.ca) – Computing Science, University of Alberta.
